TERMS OF SALE.

1. All goods are sold ex Warehouses Holland, and travel at purchaser's risk and expense.
 2. Unless contrary orders are given, forwarding- and only marine insurance will be provided for at purchaser's costs, without any responsibility for the seller.
 3. Costs of cases and packing, together with freight-, forwarding-, insurance charges and duty will be collected on delivery.
 4. All accounts are strictly due three months after date of invoice; 3 pct. discount is allowed for payments within 30 days after date of invoice. On overdue accounts 6 pct. interest per annum will be charged, together with the collection expenses.
 5. Complaints and claims about the quality of the goods cannot be entertained, unless made **immediately upon receipt** of same. If the goods are damaged the claim must be accompanied with a Lloyd's affidavit stating all particulars.
 6. No warranty express or implied will be given and the seller will not be in any way responsible for the results of planting or forcing of any bulbs and roots delivered.
 7. If at the time of shipment any account payable by the buyer to any person or to members of the Holland Bulb Exporters' Association be overdue, or the financial standing of the buyer does not appear satisfactory to the seller, the seller reserves the right to cancel any part or all of this order, without stating his reasons for doing so, nor shall the buyer have any redress whatsoever for any damages which he may sustain through this action on the part of the seller.
 8. Cancellation of orders or part of same will only be accepted when buyer agrees to pay seller his loss of profit, in no case less than 20 pct. of the amount cancelled; alterations may be allowed if both parties agree.
 9. Verbal agreements cannot be considered, unless confirmed by letter.
 10. Complete or partial failure of the general crop owing to frost, loss by fire, or through other causes beyond seller's control, entitles the seller to wholly or partly cancel this agreement at his own discretion without further recourse on the part of the buyer.
 11. By placing orders, buyer is considered to agree with these terms.

PREPARED HYACINTHS.

(FOR EARLY FORCING.)

These Hyacinths are treated in a special way, which makes them well suitable for early forcing; they should be potted directly after arrival.

As the Bulbs are lifted early and have to go through this special process, orders for these bulbs must reach us before June 1st and the shipping will commence as soon as they are ready, which is before the usual time bulbs are exported.

We strongly recommend a trial with these Hyacinths, specially to florists who have a retail trade; these early flowering Hyacinths offer a welcome material when other Hyacinths and Tulips are not yet ready.

We recommend the following varieties:

				1st size	2nd size	Min.
				p.1000	p.1000	p.1000

HYACINTHS.

HOW TO ORDER OUR HYACINTHS.

We offer our Hyacinths in various grades as mentioned below.

For selection of varieties we beg to refer to
name-list on pages 8—10.

	p. 1000
	\$ cts.
Top Size Hyacinths	80.00

In this size we offer the finest bulbs which the harvest produces. carefully selected bulbs, producing large flowers.

Recommended also for growing in water on special Hyacinth-glasses. If done in the right way, this method of growing Hyacinths will be a source of real enjoyment at home during the dark wintermonths. We suggest storekeepers to induce their customers to buy more Hyacinths for glasses. When sending us your order, write us how many Hyacinths you want for this purpose and we will select the most suitable varieties.

First Size Hyacinths	70.00
-----------------------------------	-------

This size is just one size below top size and these are also large and carefully selected bulbs, producing large flowers. Also very suitable for growing in water on glasses.

Second Size Hyacinths	60.00
------------------------------------	-------

This size we can specially recommend for general purposes, these bulbs are excellent for growing in pots and pans and the moderate price makes this grade also a welcome material for selling in stores while yet in dormant state.

Third Size Hyacinths	50.00
-----------------------------------	-------

Because the flowerspikes of this grade are not so large as those of the larger sized bulbs, this size Hyacinth is recommended for planting 3 or more bulbs in a pot or pan.

This grade is also suitable for bedding purposes.

Bedding Hyacinths	p. 1000 \$ cts.
--------------------------	--------------------

Named varieties	40.00
Seperate colors	38.00

This size is specially suitable for outside planting. The spikes are not so heavy than of larger sized bulbs and will therefore stand rainy and windy weather better.

Miniature Hyacinths

Selected Miniature ..	30.00
------------------------------	-------

Miniature Hyacinths generally force earlier than the larger size bulbs. These small bulbs produce very elegant flowers and are of great value for cutflower purposes.

On account of their loosely built flowers, and elegant habit, pans planted with Miniature Hyacinths are very attractive and graceful. For growing in pans a specially **selected**, strong size should be used. For this purpose we recommend our carefully selected Miniature.

Regular Miniature	25.00
--------------------------------	-------

For cutflower purposes our regular Miniature is very suitable.

NAME-LIST OF HYACINTHS.

Single Red and Pink.

***Garibaldi**, carmine, early.

General de Wet, Sport of Grand Maitre, light pink, large flower.

GERTRUDE, rosy pink, compact flower, good forcing variety, fine for pots

La Belle Alliance (Overwinnaar), blue and white feathered	40.00
Penserosa, magenta rose, very large	60.00
Superfine mixed	30.00

DARWIN TULIPS.

„The Aristocrats of Tulipdom”.

There is hardly any other article in the bulb-line so useful for various purposes as the Darwin Tulips.

For cutflowers no better tulips can be desired: long strong stems, bright beautiful colors, and their value is increased by their wonderful substance and lasting qualities.

Some varieties are excellent for forcing, however, Darwin Tulips cannot be forced as early and strongly as early Tulips and cannot stand so much heat.

For bedding as well, Darwins are unsurpassed; a bed of these tulips is always a glorious sight and lends each garden a distinguished aspect, while groups of Darwin Tulips planted in borders and between shrubs make a very beautiful effect.

For growing in pots and pans, the varieties Bartigon, City of Haarlem, Herc-diade, Princess Elizabeth, Professor Rauwenhoff, Roi d'Islande, Rose Copland, Victoire d'Oliveira, William Copland and William Pitt are unexcelled.

Special method to grow Darwin Tulips.

Darwin Tulips are also splendidly suitable for growing in cool greenhouses or under so called „cold glass”. The bulbs can be planted in the open ground in the houses or frames, or in beds in the open field, and the frames can be built over the beds later. The Tulips are coming into bloom gradually after the earlier forced Darwins are gone, and can be cut according to necessity.

It seems to us that this manner of growing Darwin Tulips is not so generally known yet and we recommend our friends to take a trial with this method.

	p. 1000

Collection of best named varieties, our choice	26.00
Splendid mixture in separate colors	22.00
Splendid mixture of all colors	20.00

BREEDER TULIPS.

Are the Darwin Tulips noted for their bright colors, in the Breeder Tulips the wonderful bronzy, mahogany and violet tones predominate.

There is a growing demand for these „art colored” Tulips, which shows a greater appreciation from the public for the magic, distinct beauty of the Breeder Tulips.

Like the Darwin Tulips, most Breeder Tulips have tall stems, and have great substance in their flowers, and a long flowering period.

A few varieties are also good for forcing and will prove to be of high value for such cutflower-purposes where „art colors” are desired.

SINGLE LATE TULIPS.

Single Late or Cottage and Hybrid Tulips.

No other class of Tulips has such a wide variation in color, shape and habit of flowers as the Cottage Tulips and Hybrid Tulips, and in no other class so many novelties have been introduced in the last few years.

Single Late Tulips are splendid for beds and borders as well as for cutflowers.

MENDEL TULIPS.

The originators of the Mendel Tulips aimed to obtain Tulips, having the early forcing-qualities of the Duc van Tholl-Tulips and the habit and fine colors of the Darwin Tulips and have indeed succeeded wonderfully well.

Several of these Tulips are of great value for early forcing; some have colors and tints entirely new amongst Tulips and, without doubt, this class will take a leading place amongst the forcing Tulips.

TRIUMPH TULIPS.

A new class of Tulips, striking by its very sturdy, robust habit, large flowers and new colors and tints.

Triumph Tulips are the results of crossings between Darwin and other Tulips. They flower about the same time as the latest flowering varieties of the early Tulips. Their strong habit makes these Tulips excellent for borders.

A fine class, which we recommend also for show purposes.

Sativus (Saffran Crocus) , purplish blue	18.00
Speciosus , deep blue	15.00
Zenatus , soft lilac very fine	18.00

Bulbs for Rockgardens

Rockgardening, so popular nowadays, can be made more attractive by the use of bulbs, well selected for this purpose.

The bulbfamily comprises many kinds which can be used to great advantage.

Rockgardens do not reach their prime until Summer, but when **Bulbs** are used the flowering period of a rock-garden will be extended considerably, as Bulbs produce a rich variety of form and color during Spring.

Deep, welldrained pockets of soil are required for planting the bulbs.

The following kinds will be found of special merit: Tulip species: Chrysantha, Clusiana, Eichleri, Kaufmanniana, Kolpakowskiana, Praestans. Crocus, Muscari (Grape Hyacinths), Eranthis (Winter Aconite), Galanthus (Snowdrops), Chionodoxa (Glory of the Snow), Fritillaria meleagris (Guinea Henflower), Scilla sibirica (Siberian Squill) and also the later flowering Scilla campanulata and nutans varieties (Wood-Hyacinths).

Further Anemone, Bulbocodium, Allium Molly, Erythronium, Iris reticulata, Tritelia.

Make a profit by selling
Bulbs for Rockgardens

NARCISSUS.

(Daffodils.)

The Royal Horticultural Society of England adopted a revised classification of the **Daffodils**, which, in the main, is followed in our list. According to the new arrangement the following divisions are recognized:

- I. **Trumpet Daffodils.** Trumpet or crown as long as or longer than the perianth:
 - a. **Ajax yellow.** Perianth and trumpet yellow.
 - b. **Ajax White.** Perianth and trumpet white.
 - c. **Ajax Bicolor.** Perianth white, trumpet yellow.
- II. **Incomparabilis Daffodils.** Cup or crown measuring from one-third to nearly equal the length of the perianth.
- III. **Barrii Daffodils.** Cup or crown measuring less than one third the length of the perianth.
- IV. **Leedsii Daffodils.** Comprising all the chalice-cupped and short-cupped Narcissi having white perianth and cup or crown of white, cream or pale primrose.
- V. **Jonquils** and their Hybrids.
- VI. **Tazetta (Polyanthus)** and their Hybrids.
Poetaz. Hybrids between Poeticus and Polyanthus sorts.
- VII. **Poeticus Daffodils.** All with snowy white perianth and flattened yellow crown more or less deeply colored with scarlet or crimson.
- VIII. **Double daffodils.**
- IX. **Various daffodils.**

Single Daffodils.

GLADIOLUS.

As the demand for Gladiolus increases from year to year, we offer a large list of leading varieties. Prices for large quantities on application. All Bulbs first size. Second size bulbs can be supplied at 30 % off the prices for first size bulbs.

We also offer bulblets and planting stock. Prices on these will be sent on application.

Gladiolus Nanus.

Dwarf, Summer-flowering Varieties.

Ready from October to December.

These dwarf Miniature Gladioli, flowering in July, should be planted in October or November, and covered during the frosty season with some three inches of litter. They succeed under the same treatment as other Gladioli, but require a warm dry situation and should be dug up about the end of August.
